200 to 720 A battery chargers / jump starters

12 / 24 V charging and jump starting, digital display and 7-stage charging.

Battery chargers / jump starters that recharge batteries and supply the current needed to start a vehicle with a weak battery. The digital display shows voltage and current at all times, and the current is set manually. An alarm warns of a short circuit at the output or reversed polarity. Charging runs in 7 stages, from battery diagnosis to maintenance charge, with automatic cut-off when the battery is full.
