5,600 A steel spotter with LCD screen

5,600 A spotter with LCD screen: easy-to-read settings and memory of the last parameters.

5,600 A steel spotter for all straightening and dent repair work. The digital control with LCD screen shows the welding information at a glance and delivers stable output power. Several welding modes and 4 thickness settings cover the usual situations in the workshop. The machine remembers the last settings, so you can pick up where you left off without setting everything up again.
