5,600 A steel spotter with three settings

5,600 A steel spotter: power, tool and weld time, in manual or automatic mode.

5,600 A steel spotter for panel straightening and pulling. The microprocessor needs only three settings: power (80 levels), tool and weld time (99 levels). The weld fires from the trigger with the tool pressed against the panel, or automatically on simple contact. Supplied with a full dent repair accessory kit in a case.
