Cordless lithium battery spotter

Self-contained steel spotter with no mains lead or earth cable, supplied in a carry case with two batteries.

Portable lithium battery dent repair spotter: no mains lead or earth cable gets in the way as you move around the vehicle. It welds washers and OT rings onto the steel panel to pull out dents, with spot time adjustable from 10 to 70 ms. Electronic energy management optimises battery life. Supplied in a carry case with two batteries and a charger so you can go from one job to the next.
