Ref. HE-D127

Lever-action dent pullers

Lever pullers for gradual pulling on studs, nails and glue tabs.

Lever pullers that bear against the panel to pull the metal out gradually and under control, using welded studs, nails or glue tabs. Several formats to choose from, from the quick puller to the mini frame and the hook puller.

Technical specifications

Technical data sheet available on request.

Key features

- Gradual, controlled pulling while bearing on the panel
- Several formats to suit the size of the area
- Compatible with studs, nails and glue pulling

How to use

- Localised dent repair on steel and aluminium
- Precision pulling after stud welding
