Pneumatic suction-base pulling post

Post anchored to the floor by a pneumatic suction base: quick to set up, pulls in any direction.

Pulling post whose base anchors to the workshop floor by pneumatic suction: connect the air and it is anchored, with no floor fixings and no bracing against the vehicle. The seal, bonded and recessed into the base, can be replaced in moments, and the base does not slip during pulling. The strap-and-hook winch pulls in any direction, particularly on sills and the underbody. Mounted on castors, it is easy to move around the vehicle.

Technical specifications

Power supply	Compressed air (suction anchoring)
Moving	Castors

Key features

- Floor anchoring by pneumatic suction base, quick to set up
- Bonded, recessed seal, replaceable in moments
- Non-slip base during pulling
- Crank winch with strap and hook
- Pulls in any direction
- Perforated post, height-adjustable pulling point
- Castors for moving

How to use

- Sill straightening
- Underbody pulling
- Side pulling on body sides and doors

Packaging and delivery

Version	Reference	
Standard version	HE-D132-A	Post with winch and suction base; package 122 × 42 × 20 cm, 25 kg
Tall version with auxiliary arm	HE-D132-B	Taller post with auxiliary arm and support pad; package 122 × 42 × 20 cm, 30 kg

Package dimensions : 122 × 42 × 20 cm · Package weight : 25 kg (standard) / 30 kg (tall version)
