3-cassette short-wave infrared curing lamp

Three IR cassettes, 3,600 W, for curing up to 1,000 × 1,200 mm.

Three-cassette short-wave infrared curing lamp, for curing a complete panel. Short waves penetrate the product layer and cure it through and on the surface at the same time: around 15 minutes instead of 45 with long-wave infrared. Suitable for steel and aluminium. It comes on a straight column or on a ram-assisted arm, with three levels of control: analogue, push-button or digital. Temperature, time and height are adjustable, and each cassette is controlled separately.

Technical specifications

Supply voltage	220 V
Frequency	50/60 Hz
Maximum power	3,600 W
Current draw	16 to 20 A
Curing area	1,000 × 1,200 mm
Number of cassettes	3
Display	Analogue, push-button or digital depending on model
Mobility	Mobile stand
Settings (analogue control)	Timer graduated from 10 to 60 with off / on positions, thermostat graduated from 40 to 100, switch for each cassette

Key features

- Adjustable temperature and time
- Adjustable height
- Cassette-by-cassette control
- Arm version to reach any height
- Analogue, push-button or digital control with time and power display

How to use

- Curing complete panels: door, bonnet, wing
- Filler, primer, paint and clear coat

Packaging and delivery

Version	Reference	
Straight column, analogue control	HE-L503-A	Time and temperature knobs, switch for each cassette; package 1: 73 × 23 × 78 cm, 11 kg; package 2: 6 × 6 × 152 cm, 8 kg; package 3: 48.5 × 18 × 28 cm,

Version	Reference	
		1.2 kg
Ram-assisted arm, analogue control	HE-L503-B	Time and temperature knobs, switch for each cassette; package 1: 73 × 23 × 78 cm, 11 kg; package 2: 154 × 17 × 65 cm, 32 kg
Ram-assisted arm, push-button control	HE-L503-C	On / off for each cassette, +/- settings, manual / auto mode
Ram-assisted arm, digital control	HE-L503-D	Time and power displays, +/- time and power adjustment, mode selection, on / off for each cassette and main on / off
