Electric orbital sanders with extraction

Round and rectangular electric sanders, brushed or brushless, for connection to extraction.

Electric sanders designed to work with a dust extraction unit. The 5- and 6-inch round models cover everyday sanding; the rectangular models (70 × 198, 90 × 175 and 80 × 400 mm) are for large flat surfaces. Brushless versions complement the brushed versions. Electric power gives plenty of drive and takes the strain off the operator on large panels such as front and rear bonnets, with no need for compressed air; on the other hand, it is heavier in the hand on complex-shaped parts.

Technical specifications

Pad sizes	Round 5 / 6-inch; rectangular 70 × 198 mm, 90 × 175 mm, 80 × 400 mm
Motor	Brushed or brushless depending on model
3 mm orbit / 5 mm orbit	3 mm orbit: efficiency 3/5, flatness 5/5 (finishing, filler, primer, blending); 5 mm orbit: efficiency 5/5, flatness 3/5 (rough sanding and finishing)
Round / rectangular	Round: efficiency 3/5, flatness 3/5 (panels of all shapes); rectangular: efficiency 5/5, flatness 5/5 (large flat surfaces)

Key features

- Brushed or brushless motors
- 5 / 6-inch round and rectangular formats
- Extraction outlet for dust-free sanding
- No compressed air needed

How to use

- Round, 3 mm orbit: fine sanding, filler, primer, fade-outs and blend-ins
- Round, 5 mm orbit: from rough sanding to finishing
- Rectangular: large flat surfaces
- Round: panels of any shape

Packaging and delivery

Version	Reference
5 / 6-inch round, brushed (2 models)	HE-P306-A
6-inch round, brushless (4 models)	HE-P306-B

Version	Reference
70 × 198 mm rectangular, brushless	HE-P306-C
90 × 175 mm rectangular, brushed	HE-P306-D
80 × 400 mm rectangular, brushed	HE-P306-E
